Printing on 5G Networks

- Can I use a Wireless Printer on a 5G Network??
 - Printers can work with a 5G-only router, but it depends on the printer's specifications.
 - Some printers only support 2.4GHz Wi-Fi networks.
 - 2.4GHz Network MUST be enabled on the local router.
 - If your printer only supports 2.4GHz Wi-Fi, **it will not be able to connect to a 5GHz-only router.**
 - However, if your printer supports both 2.4GHz and 5GHz Wi-Fi Networks, it WILL be able to connect to a 5GHz-only router
 - Most 5GHz routers will support 2.4GHz protocol but it must be enabled by using the Routers ADMIN functions.
